Introducing the new 26 Series No-Till Seeder with new features that make this economical seeder even better!

- Designed with ease of use in mind, the manually-adjustable front roller controls how aggressively the soil is prepped for the seedbed
- Metering components in all three boxes allow the No-Till Seeder to plant a wide variety of crops from the smallest clovers to the fluffiest native grasses
- Ground-driven rear packer roller utilizes spikes to drive the metering unit while firming the seed in place
