Shatter compaction layers and complete deep vertical tillage with the Great Plains Inline Sub-Soiler.

- With a working depth of 10" to 16", this fall tillage tool resets the soil profile with minimal topsoil disturbance
- 20" heavy-duty utility coulters cut residue directly in front of the shanks
- Choice of auto-reset or shear bolt shank mounts
- Multiple shank and point options allow you to customize the Sub-Soiler to fit your soil needs
